

- **Problem Statement:**

Design a webpage that demonstrates various text formatting options using HTML.

- **Steps to Solve:**

1. Create a basic HTML structure.
2. Use HTML tags like ``, `<i>`, `<u>`, ``, ``, and `<mark>` for formatting.
3. Display the results in a browser.

- **Output:**

Text Formatting Example

Bold text

Italic text

Underlined text

Strong text

Emphasized text

Highlighted text
