

8. Program on PHP string operations

- **Problem Statement:**

Create a PHP program that performs different string operations

- **Steps to Solve:**

- a. **Create a PHP file** with control statements like if-else.
- b. **Save the file** as control.php.
- c. **Run the PHP file** on a local server (XAMPP, WAMP) and check the output.
- d. **Modify the control structure** by adding loops or switch-case.

- **Output:**
